Dear AANP Member,

The American Academy of Nurse Practitioners is pleased to announce a valuable new service available to you as a member of our organization. AANP has teamed with MedicAlert Foundation to bring MedicAlert's medical IDs and lifesaving services to you and the patients you serve. First unveiled to members at the AANP 2012 National Conference in Orlando, the service has met with great enthusiasm as over 150 AANP members requested thousands of brochures to hand-out at their practice sites. We've enclosed a copy of the brochure in this mailing and encourage you to contact MedicAlert today at 800-346-8032 or by email at groups@medicalert.org to order a quantity for distribution to your patients.

In addition to informing and guiding first responders to the information needed for instant patient care, MedicAlert now notifies you when a patient of yours is involved in a medical emergency.

This new NP Notification Service provides you with:

- **Heads up Notification** – to alert you when your patient enters the health care system.
- **Coordination of Care** – informing you of your patient's treatment.
- **Medicine Reconciliation** –the opportunity to follow-up with your patient immediately following an emergency.
- **Maintenance of Patient/Nurse Relationships** – your personal dedication reduces fear and anxiety for your patient.

MedicAlert has pioneered the use of medical IDs, becoming the most dependable, responsive, intelligent, and trusted emergency identification and information network. We believe it's important that MedicAlert help connect you with your patients at the moment they need you most.

All patients and NPs will receive a \$10 coupon towards the purchase of a personalized medical ID when joining the MedicAlert Foundation. We hope you'll share this opportunity with your patients and take a moment to explain the peace of mind that MedicAlert products and NP Notification provides.

Thank you for your continued support of AANP.

Sincerely,

Angela K. Golden, DNP, FNP-C, FAANP
President
